- Every 20 minutes, another family receives the devastating news that their child has autism, (a lifelong neurological disorder that impairs communication, behavior, learning and social skills).
- 67 children are diagnosed per day.
- Autism is the nation's fastest-growing serious developmental disorder in the U.S.
- Thirteen years ago, 1 in 10,000 children was diagnosed with autism. Today that number is 1 in 150. (The Autism Society of America 2008)
- More children will be diagnosed with autism this year than with AIDS, diabetes & cancer combined. (Autism Speaks 2008)

Our annual fundraising event, Comedy for the Kids will help bring hope and laughter to the children whose futures are still so bright!

Every dollar raised will stay right here in our community and go directly towards those already afflicted with autism. You can help the Carrie Brazer Center for Autism rehabilitate our special children and contribute to our future building fund. We are a private non-profit school who for the past 9 years have already helped change the lives of over 250 children and their families.
